Better95™

PPE WORKERS'
WANT 2 WEAR

We concur with David Michaels PhD, MPH an epidemiologist and professor at the George Washington University School of Public Health who has said, **"The most serious hazards are the "silent killers" – the ones we can't see."** Some of these silent killers, like silica dust and asbestos, work slowly over years of continuous exposure. Others, like lead and formaldehyde, can have serious effects after relatively short exposures. Whether slow or fast, these tragedies can and must be prevented.⁽¹⁾

WORKERS WILL SACRIFICE
THEIR LONG-TERM HEALTH
FOR SHORT-TERM
COMFORT BY NOT
WEARING THEIR PPE.

WE THINK THIS IS A
TRADEOFF THAT NO ONE
SHOULD HAVE TO
CONSIDER.

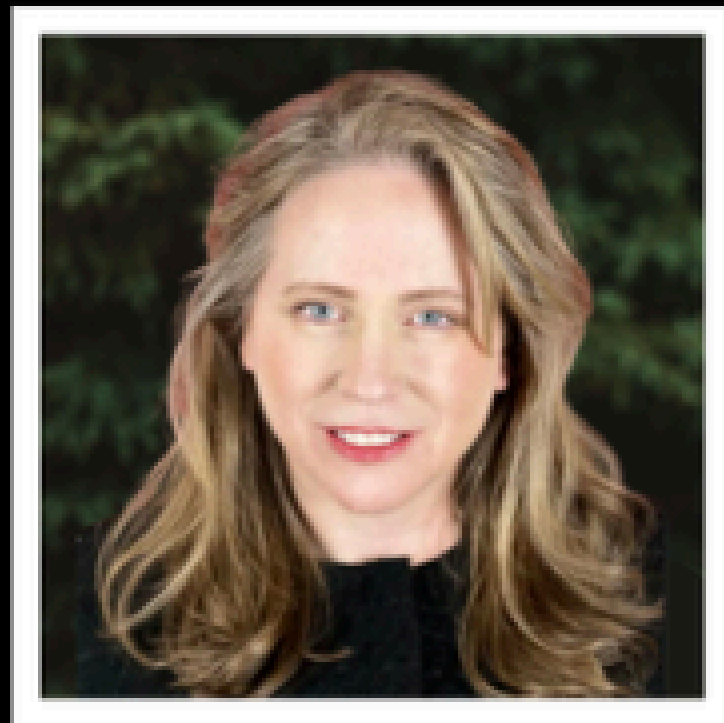

Save Lives **Fund** Mission Now

Mark Millard
Inventor & Engineer

Fun fact: It's been said that Mark can build a spaceship in his backyard if he wanted to, but instead, he decided to fix all "PPE" - Masks and Respirators **Personal Protection Equipment. U.S. Patent #11,491,355-B1 + Pending**

Deborah DeGroot
GRAI & WWS Founder

Deborah is the passionate driving force committed to doing whatever it takes to ensure that workers and patients who need a low-cost **Adaptation to Improve Respirator Safety and Access to Safer Safety.**

Mitchell Millard
Policy Project Founder

Aspiring biostatistician, developing a scientific instrument to showcase that a flexible tube validates the need for a new, safer regulatory standard, **Eliminating Rebreathing Humidity, Heat, & CO2 Trapped in a Mask Cavity.**

Youcheng Liu, MD, ScD, MPH, MS

Associate Professor of Environmental and Occupational Health Sciences at Wayne State University, 30+ years of Respirator Research, Conducting **Laboratory and Field Studies Assess Barriers, and Symptoms with Use.**
