

Guy Ngambeket is a returning ISC2 Board Director and cybersecurity executive with over 17 years of experience across strategy, digital transformation, and board-level governance.

He brings a rare combination of deep technical expertise — CISSP certified — and formal board governance credentials through his NACD.DC qualification.

A published author and international conference speaker, Guy has worked across four continents advising governments and global corporations on building secure, resilient organisations.

Guy Ngambeket

RETURNING ISC2 BOARD DIRECTOR | CYBERSECURITY EXECUTIVE | STRATEGY & GOVERNANCE

CISSP NACD.DC CISM CISA CGEIT PMP PSM ITIL v3

Guy Ngambeket served on the ISC2 Board of Directors from 2023 to 2025 as Board Member and Secretary. During that mandate he chaired the Succession Planning Committee and contributed across six committees — Audit, Ethics, Compensation, Bylaws, Strategy, and Nominations. He engaged directly with chapters across nine countries, consistently bringing member voices into the boardroom. He is now standing for re-election, ready to build on that foundation with greater experience, sharper focus, and a clear agenda.

CAREER SNAPSHOT

Guy has worked across four continents with PwC, BCG, Kearney, and FTI Consulting. Over the course of his career he has supported public and private organisations through complex cybersecurity strategy design, national cyber capability development, digital and IT transformation, AI governance, and executive-level advisory — working alongside governments, regulators, financial institutions, energy companies, and telecoms operators from Africa to the Middle East, Europe, and North America.

DRIVE FOR IMPACT

Across every role, Guy has been drawn to assignments where the stakes are highest — where cybersecurity is a national capability, not an internal IT project, and where governance is the foundation of institutional trust. On the ISC2 Board, this same drive led him to take on the Secretary role — the most operationally demanding position — while simultaneously serving on six committees and engaging with chapters across nine countries to ensure member voices reached the boardroom.

COLLABORATIVE LEADERSHIP STYLE

Guy leads by convening. Whether working with government ministers, C-suite executives, board committees, or chapter members around the world, his instinct is to listen first, build shared understanding, and then drive toward clarity and action. Colleagues consistently describe him as someone who raises the quality of every room he is in — not by dominating it, but by asking the right questions and holding the group accountable to its purpose.

A PROVEN BOARD LEADER

Guy joined the ISC2 Board at a pivotal moment, contributing directly to the governance reset and strategic realignment that stabilised the organisation. He also serves as Non-Executive Director at Shield Tech Hub, advising on governance readiness and international growth.

THE NEXT CHAPTER

As AI, quantum computing, and a global workforce shortage reshape the profession, ISC2 has a defining opportunity to lead that transition. Guy returns as a proven director who has earned member trust once, deepened his impact in the field, and is ready to serve again with a clear agenda for the global membership.
