Summary

I am seeking an online position in software development (Languages i am skilled with are C#, PHP, Python, Pascal, Shell, and Javascript), **internet marketing, search engine optimization (SEO), and/or growth hacking** (Trendy/Viral marketing, Bots, Machine Learning, & Automation).

I specialize in developing software to do automated tasks like doing SEO with automation, mass emailing, chat automation, gaming automation, mining bitcoin and other alt coins, scraping content and analyzing it (Big data), and social media botting to generate traffic. My programming experience is making software that could automate massive amounts of work and making software with human-like actions making it difficult to detect botting.

Currently seeking a full-time/part-time job, internship, or contracted work with a company where I can use my methods, algorithms, growth hacking, and/or create software to generate traffic like botting social media and SEO content creation on autopilot. I am confident enough that I can turn any company/start up business from a million dollar industry to a billion dollar industry. My programming and growth hacking experience is fully automated, secure, and full of advanced algorithms like image analysis, voice recognition, and Natural language text processing.

Experience

Chief Operating Officer & Growth hacker

Tagcandy

Apr 2016 - Sep 2019

Chief Operating Officer, Online Marketer, and Lead Developer for TagCandy. TagCandy is a hashtag analytics software that identifies trends and the analytics behind hashtags. Hashtag analytics would include sentiment analysis, top hashtags, and geo location. We worked with codeigniter and PHP to analyze the social media data.

**Watch this video to see an example of Tag Candy
(Totally worth watching!)**

Education

Southern Utah University

Computer Science

Jul 2013 - Jun 2014

I went to SUU for my computer science degree but I only attended a few semesters.

Hurricane High School

High School Diploma

Jan 2006 - Sep 2009

2008 - Student of the year in Physics.
